Apex Manufacturing
Shaping Tomorrow

At Apex Manufacturing, we believe great things happen when craftsmanship meets innovation. That's why our family-run business has spent years perfecting our approach of combining traditional skills with cutting-edge technology to create premium-quality plastic injection moulded components for a diverse range of industries.

With over three decades of combined expertise and operating from a state-of-the-art facility in Buckinghamshire, we offer agile and efficient manufacturing solutions tailored to you. We understand that no two projects are the same, which is why our team will work closely with you to understand your vision and ensure we can bring your ideas to life.

We're committed to delivering exceptional service, providing flexible thinking and unmatched value to ensure we can always exceed our clients' expectations. Whether you need precision engineering, rapid prototyping or high-volume production, we have the skills and experience to deliver.

End-to-End
Injection Moulding and Vacuum Forming Solutions

Apex Manufacturing is your trusted partner for all of your injection moulding and vacuum forming needs. From initial concept through to final delivery, our experienced team will be by your side to support and guide you at every stage of the journey.

From small prototype batches to large-scale production runs, we guarantee precision, efficiency and unrivalled quality. Our expert toolmaking team offers full tooling lifecycle support, and we utilise the latest technology and materials to create durable, high-performance moulds tailored to your exact specifications. Beyond moulding, we seamlessly integrate assembly, testing, and bespoke secondary operations, delivering a complete, ready-to-use solution.

We are proud to support critical industries, including the medical, industrial, automotive, consumer, and trade sectors. With a strong commitment to quality, compliance and innovation, we strive to provide reliable and cost-effective solutions that meet the diverse needs of our clients.

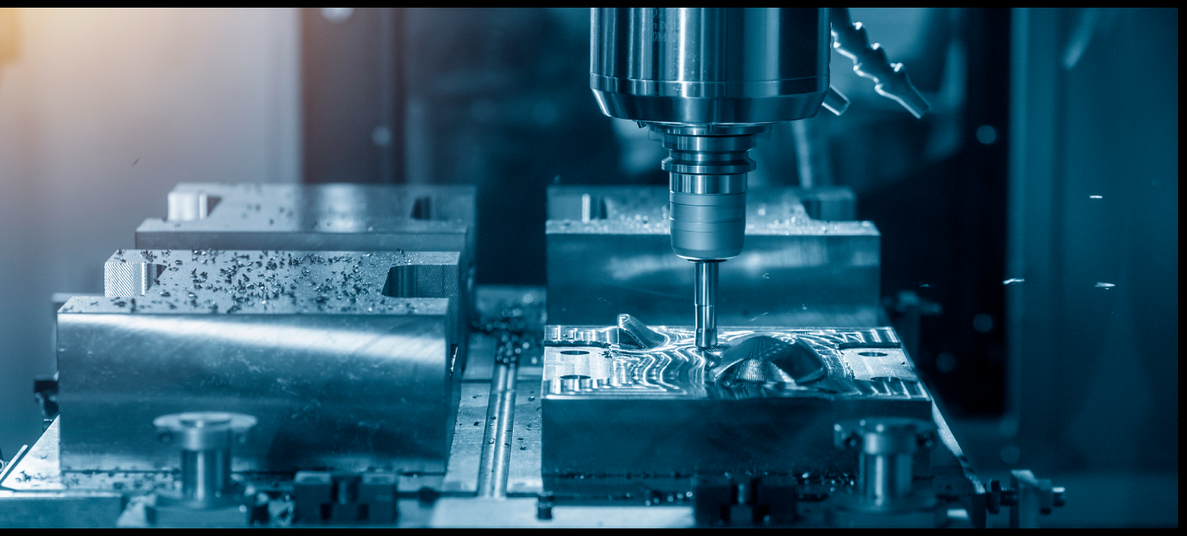
Precision Technology.
Powerful Performance.



Through cutting-edge technology and expert craftsmanship, we are able to deliver precision injection moulding and vacuum forming at scale. Our Buckinghamshire HQ is equipped with state-of-the-art machinery that ensures exceptional accuracy, consistency and efficiency, no matter how complex the project might be.

To maintain peak performance, we provide full tooling maintenance and support, helping to extend the lifespan of moulds and guarantee uninterrupted production. Our team of skilled technicians also utilise advanced diagnostics and servicing techniques to keep every tool in optimal condition.

Quality is at the heart of everything we do here at Apex Manufacturing, which is why we have a dedicated in-house quality control (QC) laboratory that rigorously tests each component, ensuring flawless results that meet the highest industry standards.

Whether starting with a prototype or moving into high-volume manufacturing, our flexible approach means we can also effortlessly scale to meet your demand.

Engineered Materials.
Certified Quality.

Choosing the right material is just as important as the design itself. With expertise in advanced thermoplastics, including ABS, PC, PA, and bespoke blends, every project we work on benefits from the perfect balance of strength, durability and performance.

Beyond material selection, we provide tailored colour-matching and performance-enhancing additives that ensure each component meets your exact specifications. Whether it's UV resistance, flame retardancy or increased impact strength, all of our materials are customised to suit the most demanding applications.

Quality isn't an afterthought at Apex Manufacturing; it's built into every step of the process. We are Certified to ISO 9001 and ISO 14001 standards and implement strict quality controls that ensure precision, consistency and sustainability. From the first moulding to the final product, you can have peace of mind that our meticulous inspections guarantee the highest standards every time.

We believe in being fully transparent with customers, which is why we provide full traceability at every stage. This ensures you can have complete confidence in the materials and processes we employ, and every component is checked, documented and verified to guarantee reliability and compliance.

As part of our long-term commitment to quality and regulatory excellence, we are actively working toward achieving ISO 13485 certification to enhance our medical device quality management systems further.

Unrivalled Expertise.
Dependable Delivery. Sustainable Results.

Collaborative Design.
Exceptional Support.

We believe that great ideas deserve great support. That is why collaboration is at the heart of every project we undertake, with our partnership-driven approach ensuring your designs are optimised to your requirements from the very first moment.

From initial concepts to prototyping, our expert team is here to bring your ideas to life as efficiently and effectively as possible. We bring our three decades of design-for-manufacture expertise to ensure we can add real value to your project, refining components for better performance, cost efficiency and seamless production.

Our fast and friendly support team is always on hand to answer any questions you might have, help you solve challenges and provide proactive advice to ensure your project remains on track. No matter whether we're working with an emerging brand or a global industry leader, our commitment remains the same: It's not about manufacturing parts, but building strong, long-term partnerships.

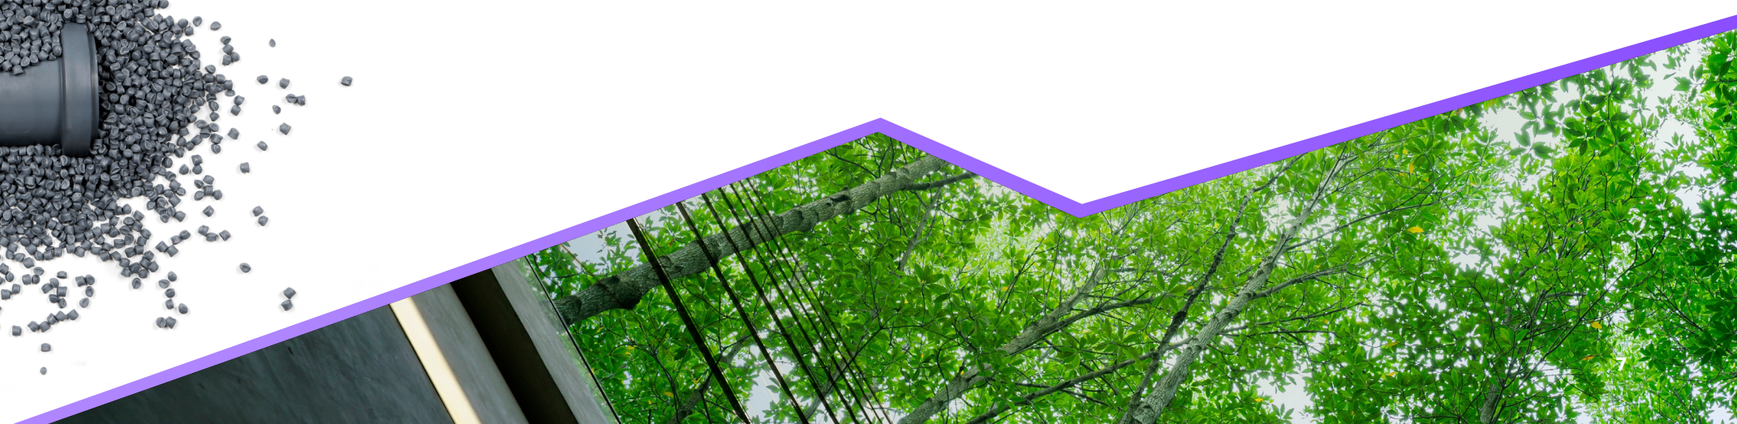
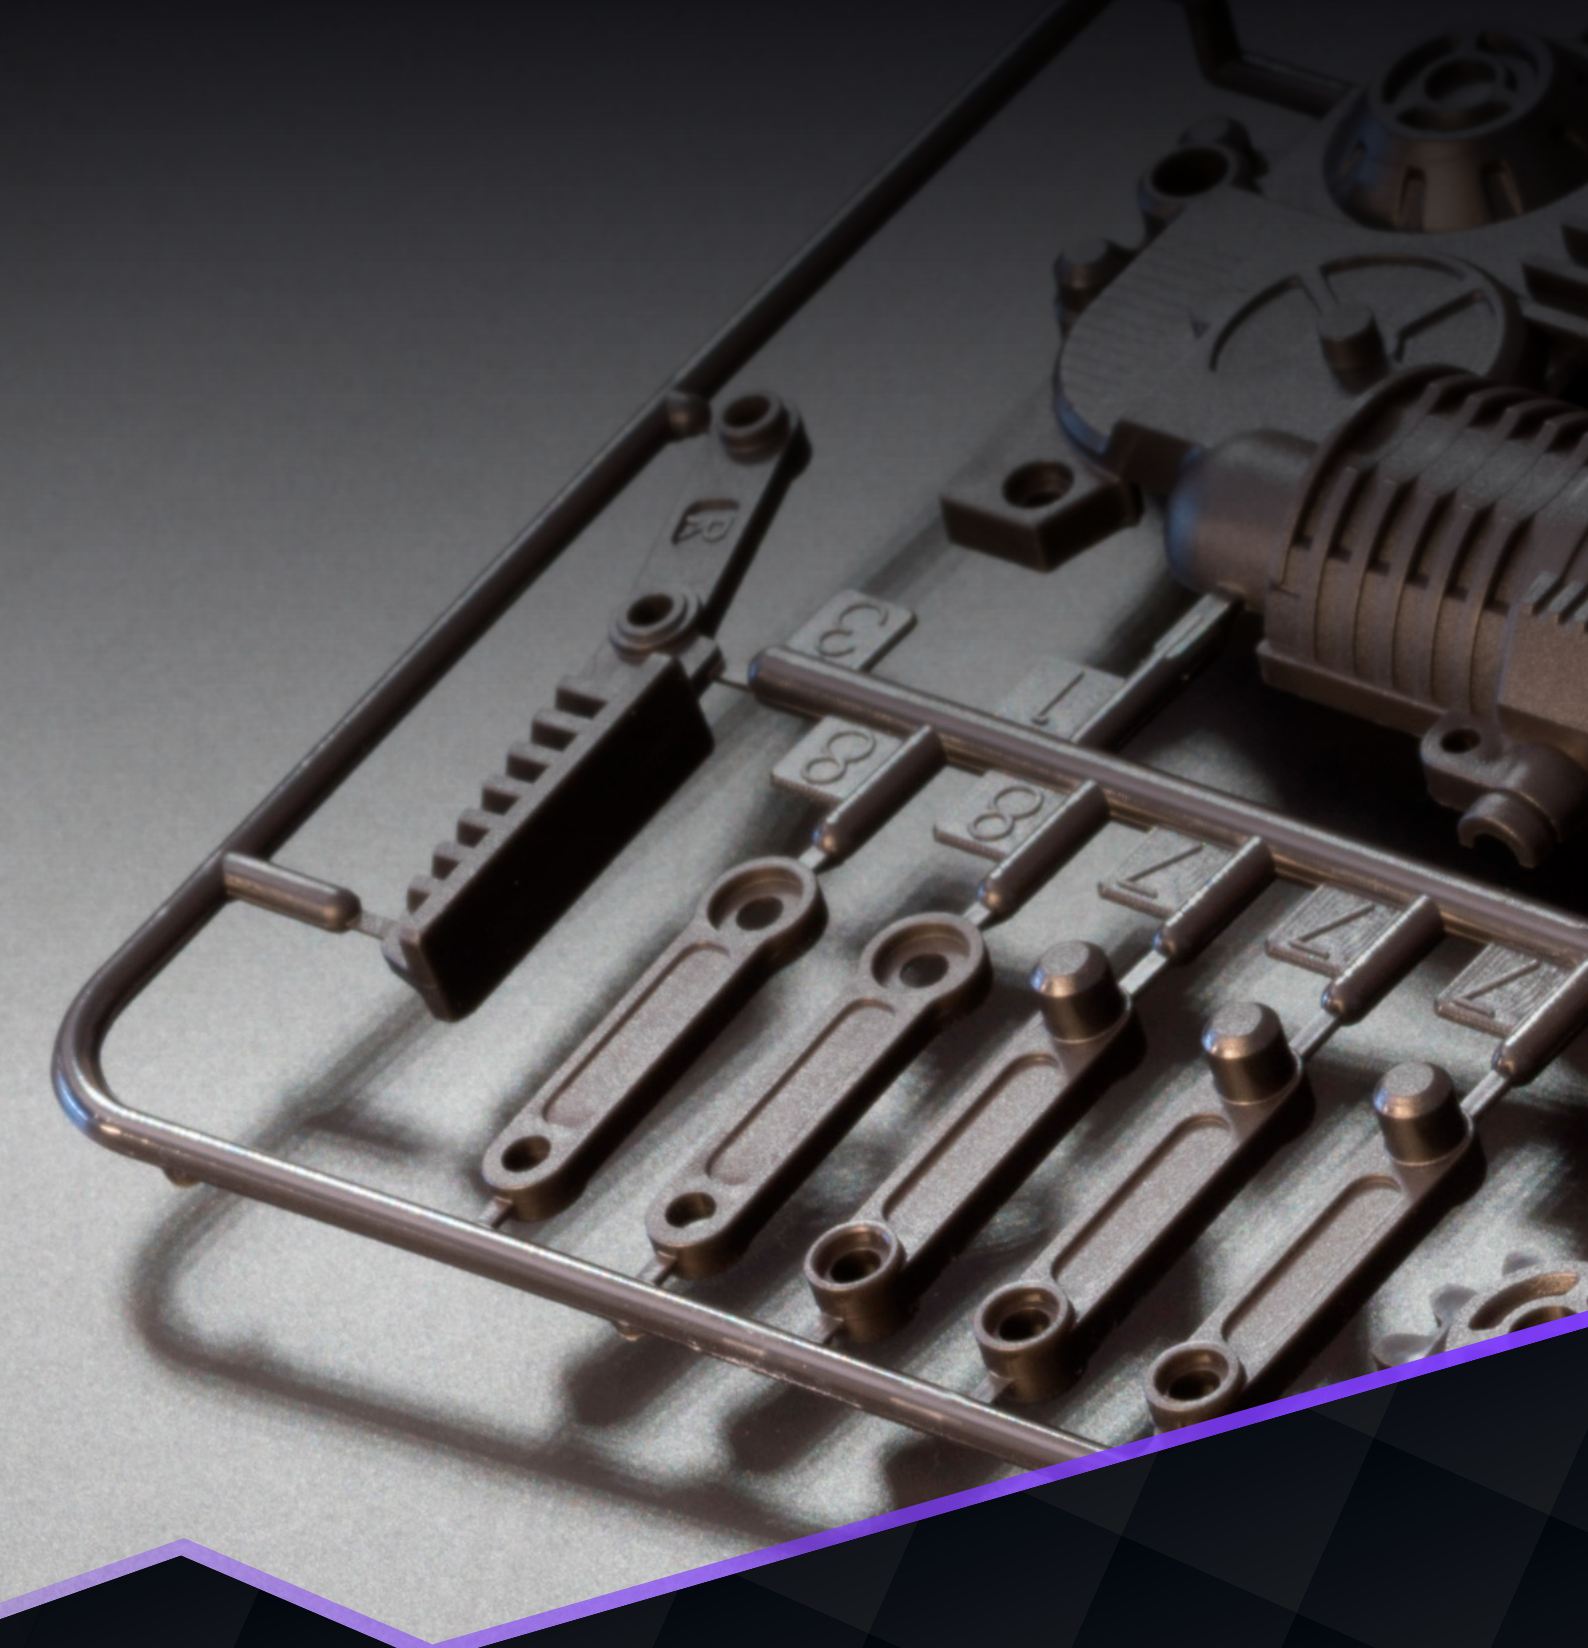
Sustainably Engineered.
Sector-Focused.

At Apex Manufacturing, we believe sustainability is a responsibility. That's why every step of our manufacturing process has been carefully designed to minimise waste, optimise energy performance and reduce our environmental impact. This green manufacturing ethos is not only designed to minimise our impact on the environment but also to guarantee the highest standards of quality and performance.

Our customers are able to choose from a wide range of regrind, recycled and eco-optimised materials, which have been carefully selected for their durability and sustainability. Whether reducing plastic consumption or enhancing recyclability, there's always a smarter way to manufacture.

Our products are trusted across multiple industries, from healthcare and automotive to consumer tech and electronics, while our expertise spans a wide range of critical sectors. So if you're looking for precision, reliability and sustainability without compromising on quality, contact our team today.





Let’s Build Something Brilliant Together.
